DETAILED ACTION

Claim Objections

1. Claims 1-10 are objected to because of the following informalities:

In claim 1, lines 3-4, it appears that "holes" should be changed to --hole--. In lines 6-10, applicants should clarify what applicants intended by "whereby ... the distributing board."

In claims 2-10, the phrases "characterized in that " should be rephrased.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3-5 and 7-10 are rejected under 35 U.S.C. 102(b) as being anticipated applicant admitted prior art (APA').

APA' [figures 9-11] discloses an electrical junction box comprising:

- an upper cover [1];
- a distributing board [4];
- a wiring sheet [6];

Art Unit: 2839

- a lower cover [10] formed with a plurality of through holes;
- a plurality of terminals of bus bars [5] ;
- the wiring sheet is formed with a plurality of through holes for receiving the terminals of the bus bars; and
- the details of the covers , the distributing board, the wiring sheet and the bus bars are shown in the figures 9-1].

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2, 4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over APA'.

APA' discloses the instant claimed invention as described above except for the though hole is tapered. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the through hole so that it has a tapered cross section since it was known in the art that the tapered hole will assist the insertion of the pin or contact therethrough.
